

CARRIER RATE MANAGEMENT

Elemica SmartLink Logistics Management Application

Do you have one version of your negotiated carrier rate that is accessible by all and guaranteed to be current?

Managing rate communications across transportation managers and carriers is difficult at best. Having a system of record, accessible to your entire company, reduces reworking and increases compliance to routing guides. And by integrating with your transportation management system, you maintain accurate shipment rating systems and carrier rates.

The largest industry-specific logistics collaboration network with cloud-based solutions for automating your transport processes.

Benefits

- Increases accuracy
- Expands communication across transportation management
- Eliminates poor rate management practices
- Improves operational efficiencies and utilization

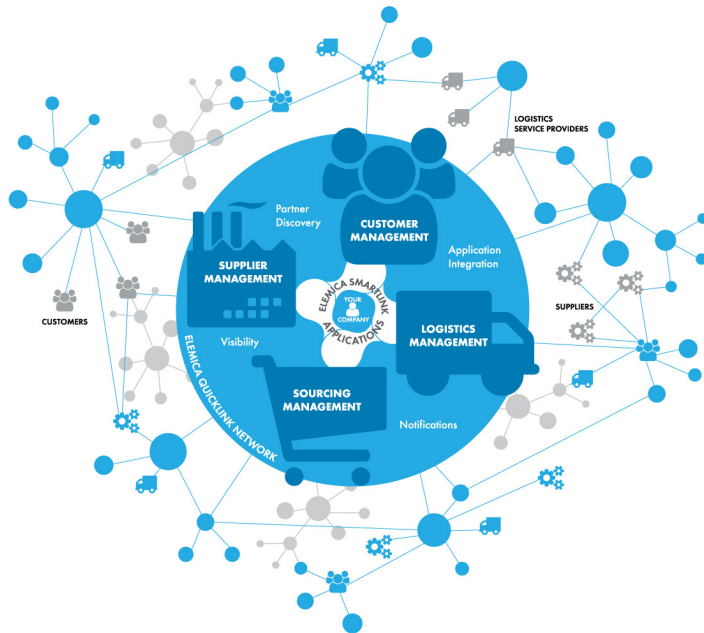

Key Capabilities

- Includes rate generation and rate repository update
- Multi-mode transportation rate tabler
- Self-service portal access via the cloud
- Alerts to monitor rate changes and expiration
- Bulk upload ability via Excel template

Elemica's Carrier Rate Management solution provides a platform for maintaining rates from time of award to expiration. Carriers, transportation managers and procurement specialists will be able to collaborate on changes to rates and be alerted when rates are nearing expiration. Allowing your carriers to access and suggest changes, which you must approve before implementing, creates an efficient environment. This solution integrates tightly with our logistics sourcing solution to provide up-to-date rate information.

Logistics Management Solution Suite Overview

Elemica Logistics Management seamlessly connects you to all of your LSPs while providing standardized processes that deliver innovative capabilities:

Road Transport Execution:

Automate communication with road carriers, collaborate on accessorial charges and maintain visibility of shipment throughout life cycle.

Ocean Transport Execution:

Automate communication with ocean carriers, collaborate on BOL master data, and maintain visibility.

Time Slot Booking/Time Slot Optimization:

Collaborate with carriers for appointment scheduling to eliminate detention charges.

Terminal and Warehouse Visibility:

Connects shippers to their third-party warehousing providers.

Carrier Rate Management:

Maintain rates from time of award to expiration.

Freight Invoice Management:

Allow carriers to create freight invoices from pre-approved shipment cost elements.

Transforming the Way Your Company Does Business

As the leading Supply Chain Operating Network for the global process industries, our customers create and operate high performance supply chains with solutions at the heart of their business. Elemica drives bottom line business results by promoting reduced cost of operations, faster process execution, automation of key business processes, removal of transactional barriers, and seamless information flow between business partners. We transform supply chains by replacing manual and complex approaches with automated and reliable ones.
