

# DELIVERY FORECAST

Elemica SmartLink Supplier Management Application

## What would a more accurate delivery forecast mean for your business?

Analyzing your demand by manually reviewing delivery forecasts is tedious, costly and error-prone. Now, you can streamline your process by standardizing and automating order determination and generation with your suppliers.

**The largest industry-specific supplier collaboration network with cloud-based solutions for automating your supply chain processes.**

### Benefits

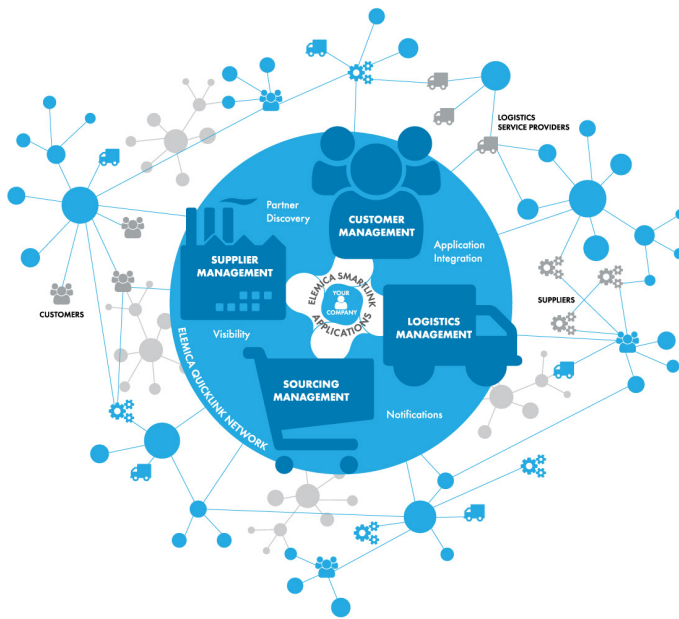

- Reduce or eliminate incorrectly scheduled shipments
- Increase visibility and gain more control over order determination

### Key Capabilities

- Provides visibility into future demand
- Automatically generate orders based on customized parameters
- Automate the schedule comparison process
- Provides email alerting based on business rule exceptions
- Supports a portfolio of international and local message standards

Elemica's Delivery Forecast (DELFOR) solution is a transaction that combines the order with a forecast. Trading partners usually do not have the necessary systems to accept embedded releases with forecast information. In order to alleviate issues with the complexity of processing the DELFOR message, we designed an engine that splits the forecast and the orders within the message. Once a DELFOR is received and split, the orders are stored in a database. Subsequent orders or changes are validated against existing orders to ensure the trading partners do not receive duplicate orders. Changes are flagged and transmitted to the partners as an Order Change message.

# Solutions Across the Entire Supply Chain

## Supplier Management Solution Suite Overview

**Elemica Supplier Management delivers results that drives the ideal balance of inventory, working capital and service levels while providing innovative capabilities:**

### **Purchase Order Management:**

Eliminates the risk of small errors with manually entered orders.

### **Vendor Managed Inventory:**

Provides supply visibility across customers and products.

### **Delivery Forecast:**

Furnishes the supplier with discreet orders, order changes, and forecast documents.

### **Global Supply Management:**

Supports automation, visibility, management and analysis for shipments and inventory across global supply chains.

### **Certificate of Analysis (CoA):**

Attest or affirm the provided quality data is correct for a given product.

### **Invoice Management:**

Electronic invoicing for material, service and freight invoices.

## Transforming the Way Your Company Does Business

As the leading Supply Chain Operating Network for the global process industries, our customers create and operate high performance supply chains with solutions at the heart of their business. Elemica drives bottom line business results by promoting reduced cost of operations, faster process execution, automation of key business processes, removal of transactional barriers, and seamless information flow between business partners. We transform supply chains by replacing manual and complex approaches with automated and reliable ones.
