

# FREIGHT INVOICE MANAGEMENT

Elemica SmartLink Logistics Management Application

## How significant would your savings be if you could eliminate freight audits without increasing freight costs?

Ineffective manual processes often result in costly errors and audits. By automating approval processes for freight costs, you and your carriers save time and money. You provide the approved costs and your carrier produces a pre-approved invoice, ready for fast payment.

**The largest industry-specific logistics collaboration network with cloud-based solutions for automating your transport processes.**

### Benefits

- Increases accuracy
- Dramatically reduces audit requirements and claims process
- Decreases accounts payable time wasted on incorrect freight invoices
- Better operational efficiencies and utilization

### Key Capabilities

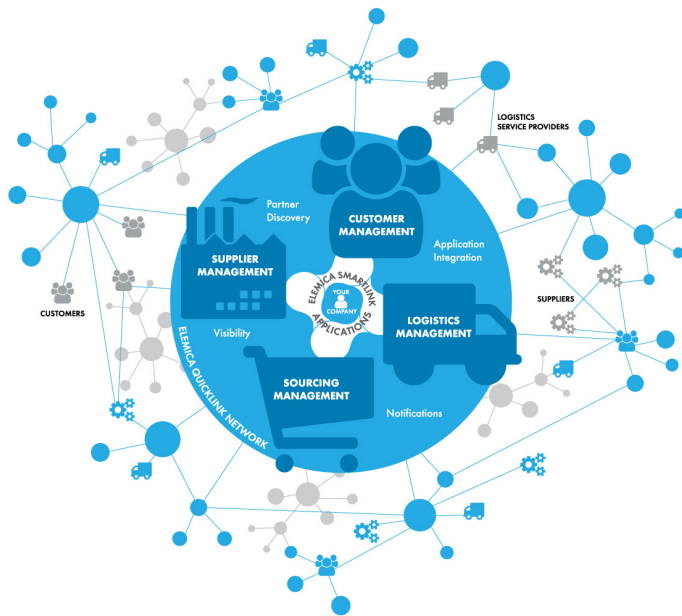

- Change and exception management through alerting
- Fully complies with EU invoicing requirements
- Automates freight invoicing with all carriers
- Standardizes and automates processes for efficiency

Used in conjunction with the Extra Cost Collaboration feature of Elemica's Road Transport Execution, Freight Invoice Management gives your carriers the ability to include only pre-approved costs on your invoices. You supply your accrued costs for each shipment, the carrier modifies and adds additional costs as they are incurred, you approve those changes, and the carrier produces an approved invoice.

Adoption rate among carriers is high because they improve efficiencies and get paid quicker. You improve your accounts payable by receiving electronic freight invoices from everyone, even your partners without EDI capabilities.

**Solutions for Transportation,  
Customer Service and  
Procurement Organizations**

# Solutions Across the Entire Supply Chain

## Logistics Management Solution Suite Overview

**Elemica Logistics Management seamlessly connects you to all of your LSPs while providing standardized processes that deliver innovative capabilities:**

### Road Transport Execution:

Automate communication with road carriers, collaborate on accessorial charges and maintain visibility of shipment throughout life cycle.

### Ocean Transport Execution:

Automate communication with ocean carriers, collaborate on BOL master data, and maintain visibility.

### Time Slot Booking/Time Slot Optimization:

Collaborate with carriers for appointment scheduling to eliminate detention charges.

### Terminal and Warehouse Visibility:

Connects shippers to their third-party warehousing providers.

### Carrier Rate Management:

Maintain rates from time of award to expiration.

### Freight Invoice Management:

Allow carriers to create freight invoices from pre-approved shipment cost elements.

## Transforming the Way Your Company Does Business

As the leading Supply Chain Operating Network for the global process industries, our customers create and operate high performance supply chains with solutions at the heart of their business. Elemica drives bottom line business results by promoting reduced cost of operations, faster process execution, automation of key business processes, removal of transactional barriers, and seamless information flow between business partners. We transform supply chains by replacing manual and complex approaches with automated and reliable ones.
