

# LOGISTICS MANAGEMENT

Elemica SmartLink Application Suite Overview

## Why have seamless collaboration across your supply chain?

Rising costs and shrinking budgets add to today's resource constrained environment. It's never been more difficult for logistics departments to maintain service levels required by their customers. ERP implementations were supposed to support the breadth of your operations. However, they have failed to provide the automation promised and are inherently weak on partner collaboration.

**Collaborative end-to-end logistics solutions with fast access to your LSP network that allow you to eliminate errors, reduce logistics spend and achieve the promises of an automated supply chain.**

### Benefits

- Reduces transportation costs & disruptions
- Dramatically reduces detention and demurrage costs
- Eliminates freight audit costs
- Increases customer satisfaction
- Eliminates shipment errors & administrative effort to handle contingencies

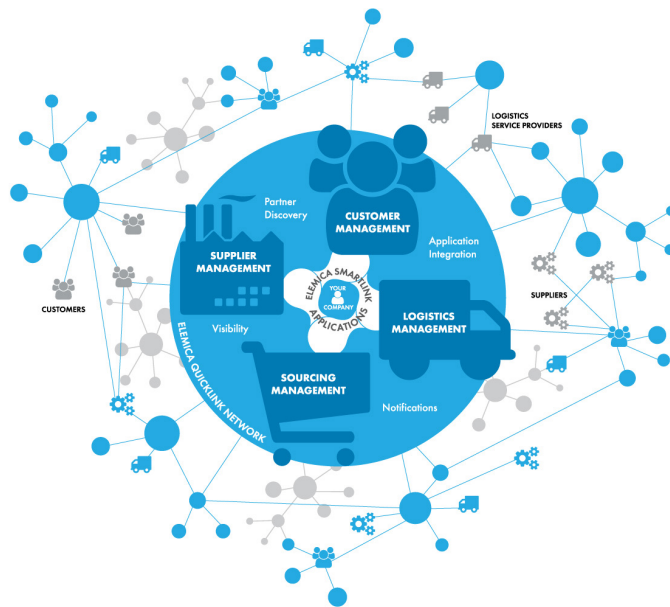

### Key Capabilities

- Real-time shipment visibility and control
- More reliable and efficient transportation scheduling
- Appointment time slot booking including obeying resource constraints
- Global logistics processes supported in your native language
- Collaboration on negotiated rates, shipment documentation, accessorial charges

Elemica's Logistics Management Suite provides a mechanism for collaborating with your Logistics Service Providers (LSPs) in the manner most efficient for all parties. We have identified and addressed specific areas traditionally fraught with double-entry of data, phone calls & faxes, and Email conversations. Replacing these with capabilities proven to remove administrative effort and lower transportation costs offer superior results. Our solutions include access to our unprecedented network of carriers, forwarders, terminal operators and warehouse providers, representing an overwhelming number of the LSPs utilized in the industries we serve.

## Logistics Management Solution Suite Overview

**Elemica Logistics Management seamlessly connects you to all of your LSPs while providing standardized processes that deliver innovative capabilities:**

### Road Transport Execution:

Automate communication with road carriers, collaborate on accessorial charges and maintain visibility of shipment throughout life cycle.

### Ocean Transport Execution:

Automate communication with ocean carriers, collaborate on BOL master data, and maintain visibility.

### Time Slot Booking/Time Slot Optimization:

Collaborate with carriers for appointment scheduling to eliminate detention charges.

### Terminal and Warehouse Visibility:

Connects shippers to their third-party warehousing providers.

### Carrier Rate Management:

Maintain rates from time of award to expiration.

### Freight Invoice Management:

Allow carriers to create freight invoices from pre-approved shipment cost elements.

## Transforming the Way Your Company Does Business

As the leading Supply Chain Operating Network for the global process industries, our customers create and operate high performance supply chains with solutions at the heart of their business. Elemica drives bottom line business results by promoting reduced cost of operations, faster process execution, automation of key business processes, removal of transactional barriers, and seamless information flow between business partners. We transform supply chains by replacing manual and complex approaches with automated and reliable ones.
