

TERMINAL AND WAREHOUSE VISIBILITY

Elemica SmartLink Logistics Management Application

Why pay extra for your ERP terminals at your external storage provider sites?

Terminal and warehouse providers have their own systems which are rarely integrated with your backend ERP systems. External storage providers have to perform double-entry of information when they receive orders, receive inbound shipments or deliver shipments on your behalf. Higher costs from them means higher costs for you.

Cloud based solutions offering fast and easy implementations with the flexibility to adapt to your dynamic business needs.

Benefits

- Reduces errors via automated business process monitoring and alerting
- Increases data security by eliminating remote access
- Improve speed and accuracy of available to promise inventory
- Accelerate time-to-invoice and month-end closing

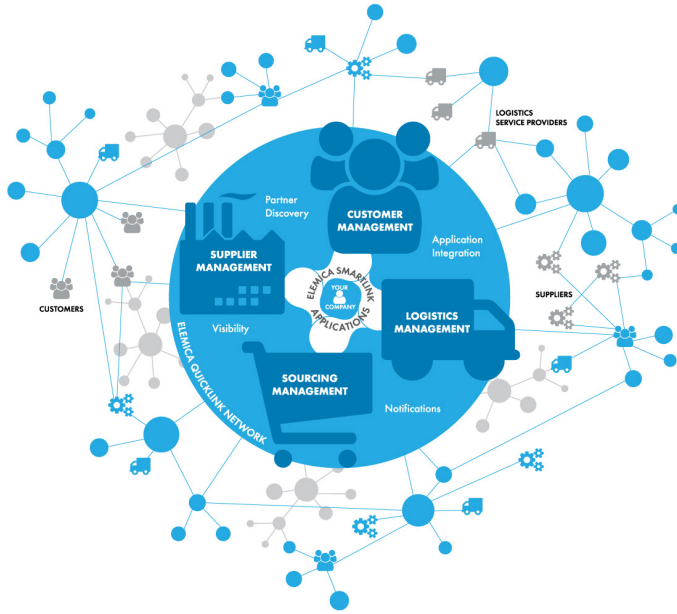

Key Capabilities

- Standardize message formats and business processes
- Allows warehouses to maintain current technical capabilities
- Proactive issue resolution, including exception-based alerting and PGI/PGR positive confirmation
- Synchronize shipper and 3PL inventories

Suppliers often outsource storage functions to Third Party Logistics Providers (3PLs). These partners store materials in a network of terminals and warehouses to maximize distribution efficiencies. 3PL networks can become quite complex, with multiple communication streams and growing operational challenges. Ineffective manual processes often result in costly delays and errors, while leading to customer service issues and dissatisfaction. This solution allows you to transact with all of your partners in the same way overcoming complications from different communication methods.

Logistics Management Solution Suite Overview

Elemica Logistics Management seamlessly connects you to all of your LSPs while providing standardized processes that deliver innovative capabilities:

Road Transport Execution:

Automate communication with road carriers, collaborate on accessorial charges and maintain visibility of shipment throughout life cycle.

Ocean Transport Execution:

Automate communication with ocean carriers, collaborate on BOL master data, and maintain visibility.

Time Slot Booking/Time Slot Optimization:

Collaborate with carriers for appointment scheduling to eliminate detention charges.

Terminal and Warehouse Visibility:

Connects shippers to their third-party warehousing providers.

Carrier Rate Management:

Maintain rates from time of award to expiration.

Freight Invoice Management:

Allow carriers to create freight invoices from pre-approved shipment cost elements.

Transforming the Way Your Company Does Business

As the leading Supply Chain Operating Network for the global process industries, our customers create and operate high performance supply chains with solutions at the heart of their business. Elemica drives bottom line business results by promoting reduced cost of operations, faster process execution, automation of key business processes, removal of transactional barriers, and seamless information flow between business partners. We transform supply chains by replacing manual and complex approaches with automated and reliable ones.
