

VENDOR MANAGED INVENTORY

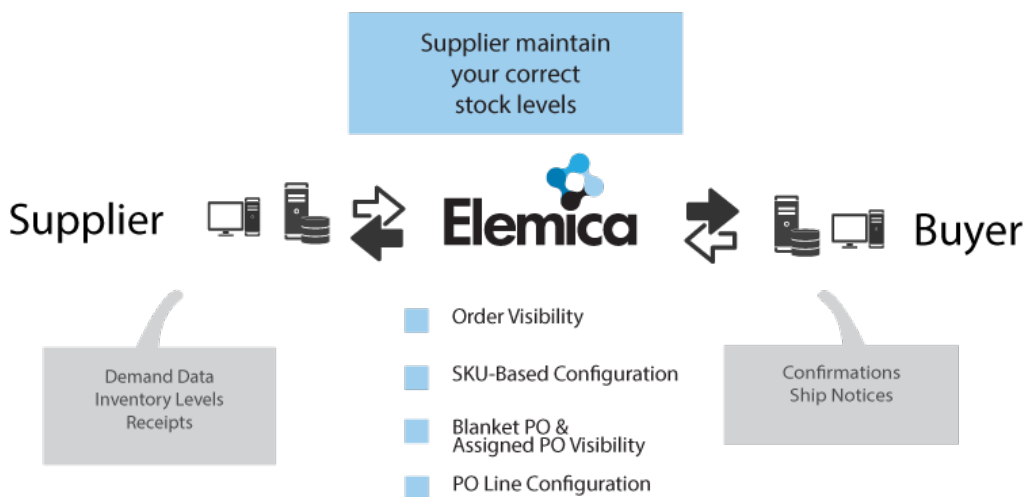

Elemica SmartLink Supplier Management Application

What results could your organization achieve with Vendor Managed Inventory?

Managed inventory programs often require planners to analyze order information using web portals and spreadsheets. These manual approaches put inventory policy and working capital at risk while increasing workload and can result in costly inventory inefficiencies. Gain control over the inventory in your supply chain and reduce unplanned events.

The largest industry-specific supplier collaboration network with cloud-based solutions for automating your supply chain processes.

Benefits

- Minimizes risk and potentials for stock outages
- Reduces inventory in the supply chain
- Increases operational efficiencies and utilization
- Improves supplier and manufacturer relationships
- Provides supply visibility across supplier and manufacturer

Key Capabilities

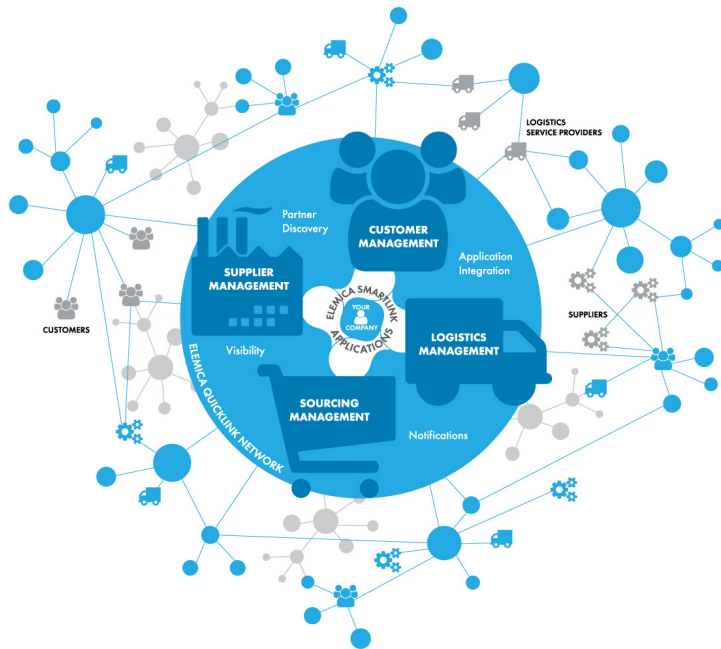

- Streamline and simplify your VMI process
- Establish enterprise management and enforcement of inventory policies
- Email alerts based on business rule exceptions
- Automatic creation of sales orders and changes into supplier's format
- Supports a portfolio of international and local message standards

Elemica's Vendor Managed Inventory (VMI) solution receives inventory, forecast. Elemica's VMI Solution utilizes exception-based alerting to proactively manage the process - enabling you to eliminate errors, stock outs and emergency shipments.

With this solution, you can roll out standardized enterprise-wide VMI processes and inventory management controls and scale your operation, without adding overhead costs, to achieve new levels of efficiency and profitability.
