

OCEAN TRANSPORT EXECUTION

Elemica SmartLink Logistics Management Application

What would consistent and transparent ocean delivery performance mean to your customers?

Global commerce requires the movement of your vital supply chain materials via ocean transport. Knowing exactly where your cargo is located is imperative to on-time deliveries. By automating the execution of your ocean transport shipments, you eliminate errors and rework, reduce administrative costs, and accurately track customer service metrics.

The largest industry-specific logistics collaboration network with cloud-based solutions for automating your road transport processes.

Benefits

- Increases accuracy and speeds fulfillment
- Lowers shipment expenses
- Eliminates inefficiencies and errors
- Reduces accounts payable time wasted on incorrect freight invoices
- Reduces premium freight by alerting to changes and response issues

Key Capabilities

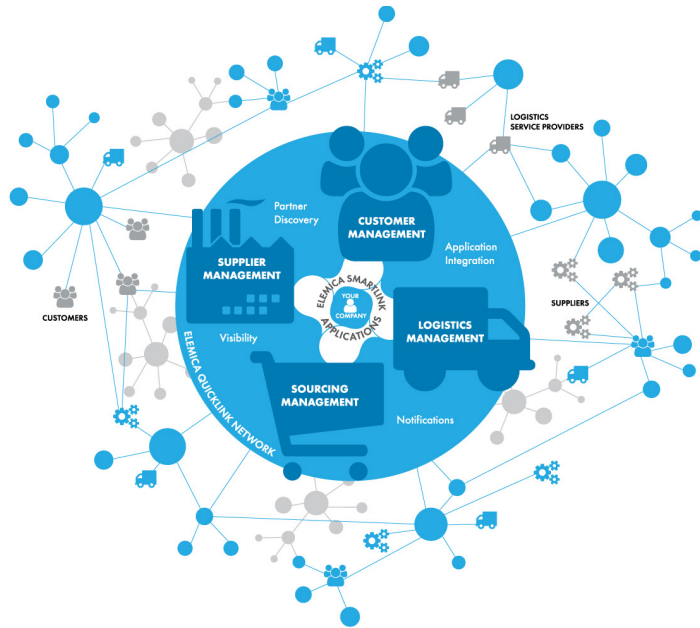

- Negotiate approval process with all collaboration partners
- Automate booking confirmations directly with carrier
- Obtain sailing schedule data directly from carrier (INTTRA)
- Connect carriers to a single platform
- Alerts to monitor shipments, documentation and inventory events

Elemica's Ocean Transport Execution solution removes communication and transactional barriers within your current processes. All parties, regardless of company size, location or IT capabilities can share information, gain insight and operate together to improve response times and customer satisfaction. We provide a platform for shippers, carriers, and forwarders to collaborate on BOL master data prior to vessel departure to eliminate errors that delay documentation processing.

Elemica provides real time shipment updates from carriers and carrier networks based on PO, BOL, or Container number. You can view from any perspective - you can be the shipper or consignee. In addition, we offer a complete set of notifications and proactive alerts.

Logistics Management Solution Suite Overview

Elemica Logistics Management seamlessly connects you to all of your LSPs while providing standardized processes that deliver innovative capabilities:

Road Transport Execution:

Automate communication with road carriers, collaborate on accessorial charges and maintain visibility of shipment throughout life cycle.

Ocean Transport Execution:

Automate communication with ocean carriers, collaborate on BOL master data, and maintain visibility.

Time Slot Booking/Time Slot Optimization:

Collaborate with carriers for appointment scheduling to eliminate detention charges.

Terminal and Warehouse Visibility:

Connects shippers to their third-party warehousing providers.

Carrier Rate Management:

Maintain rates from time of award to expiration.

Freight Invoice Management:

Allow carriers to create freight invoices from pre-approved shipment cost elements.

Transforming the Way Your Company Does Business

As the leading Supply Chain Operating Network for the global process industries, our customers create and operate high performance supply chains with solutions at the heart of their business. Elemica drives bottom line business results by promoting reduced cost of operations, faster process execution, automation of key business processes, removal of transactional barriers, and seamless information flow between business partners. We transform supply chains by replacing manual and complex approaches with automated and reliable ones.
