

DELIVERY SCHEDULE

Elemica SmartLink Customer Management Application

Are you spending too much time on tedious, error prone tasks when manually processing schedule lines?

Analyzing customer requirements by manually reviewing customer delivery forecasts is tedious, costly, and error-prone. Now, you can streamline your process by standardizing and automating order determination and generation.

Cloud based solutions offering fast and easy implementations with the flexibility to adapt to your dynamic business needs.

Benefits

- Fewer order errors
- Fewer problem shipments
- Increased control
- Enhanced visibility

Key Capabilities

- Schedule analysis
- Automatic order generation
- SKU-Plant level config
- Rule-based alerting
- Visibility & Auditability

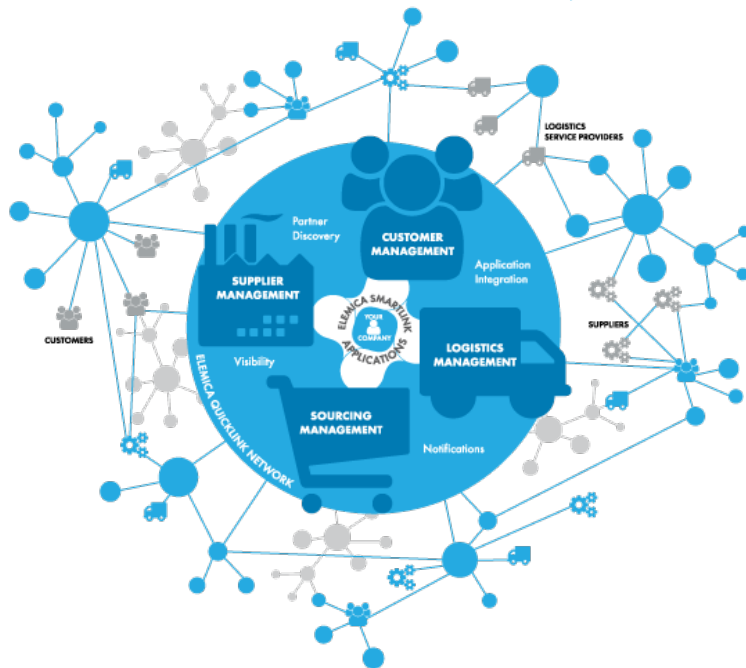

Improvements

- Self-serve setup
- Cross-industry support
- Plant-variance support
- User settable algorithms

Elemica's Delivery Schedule Solution removes the disparity between traditional order-to-cash customers and customers who send schedule line orders. Our Delivery Schedule solution allows Customer Service Representatives to manage customer re-supply versus struggling with less-than-user-friendly document formats. It compares and contrasts sequential demand schedules and posts as orders and changes to your ERP based on your business rules.

Elemica provides solutions to automate thousands of your customers. They inherently have variation in their business processes and information technologies. We remove the challenges of this variability and enable error-free automation of customers with virtually no change in their behavior. This platform supports standard order management through complex supply chain orchestrations involving multiple service providers.

Solutions Across the Entire Supply Chain

Customer Management Solution Suite Overview

Elemica Customer Management enables you to automate a wide variety of customer fulfillment requirements without modifying your ERP system.

Sales Order Management:

Supports the full order-to-invoice process in real-time, with or without B2B infrastructures, yes - even Email or print orders.

Vendor Managed Inventory (VMI):

Maintains tank or warehouse levels based on your supply strategy and inventory readings, demand forecasts, and in-transit status.

Repeat Order Entry:

Supports batch order entry at the beginning of the year, quarter, or month.

Rail Car Fulfillment:

Kanban system to maintain the optimal of rail cars at your customer's location and in transit to support your supply strategy.

Delivery Schedule:

Automate tedious, error-prone schedule line processes.

Additionally, Elemica's Invoice Management solution automates invoices and supports EU VAT compliant digital signatures and data archive.

Transforming the Way Your Company Does Business

As the leading Supply Chain Operating Network for the global process industries, our customers create and operate high performance supply chains with solutions at the heart of their business. Elemica drives bottom line business results by promoting reduced cost of operations, faster process execution, automation of key business processes, removal of transactional barriers, and seamless information flow between business partners. We transform supply chains by replacing manual and complex approaches with automated and reliable ones.
