

REPEAT ORDER ENTRY

Elemica SmartLink Customer Management Application

Do you have customers who order the same product week after week after week?

Some customers may provide you with a number of deliveries for the upcoming year and request you manage the specific arrival quantities and dates as the delivery time approaches. Managing ordering processes like this directly in the ERP can be cumbersome, lead to document reversals, and have adverse impacts on Materials Resource Planning.

Cloud based solutions offering fast and easy implementations with the flexibility to adapt to your dynamic business needs.

Benefits

Increase your CSR's ability to have value-adding business conversations with your customers

Improve customer service through the elimination of data errors and delays

Reduce costs and inefficiencies

Key Capabilities

Automate your order management process with "touchless", error-free orders

Batch upload of purchase orders at the beginning of a period

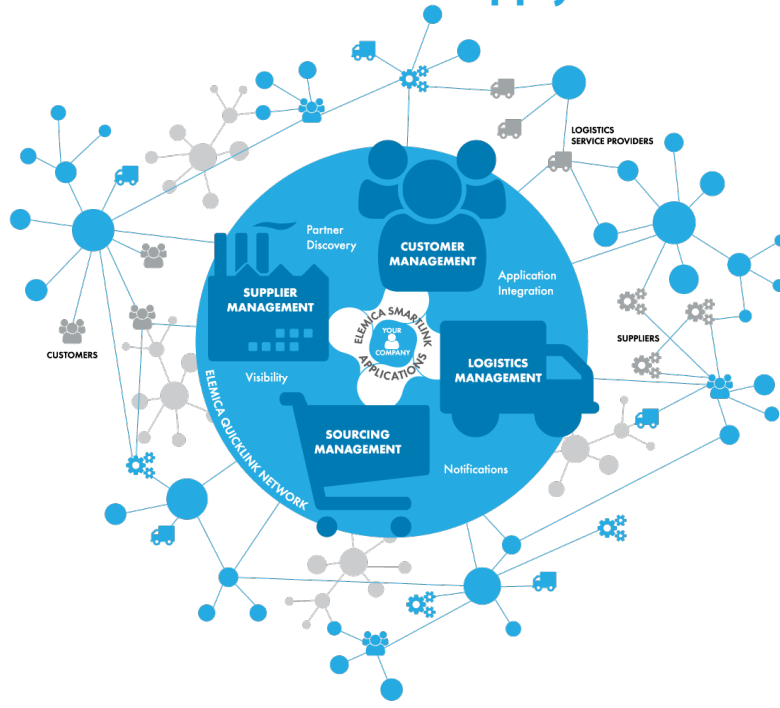

Efficiently automate labor intensive ordering situations

Provide exception-based alerting

Elemica's Repeat Order Entry Solution is an easy to use tool that greatly simplifies these processes. It lets you and your customer collaboratively plan deliveries on a daily, weekly, or monthly basis.

Our solution provides a flexible order upload capability which allows you to stage days, months or even a year's worth of orders and release them into your ERP solution on a controlled timetable.

Solutions Across the Entire Supply Chain
