

VENDOR MANAGED INVENTORY

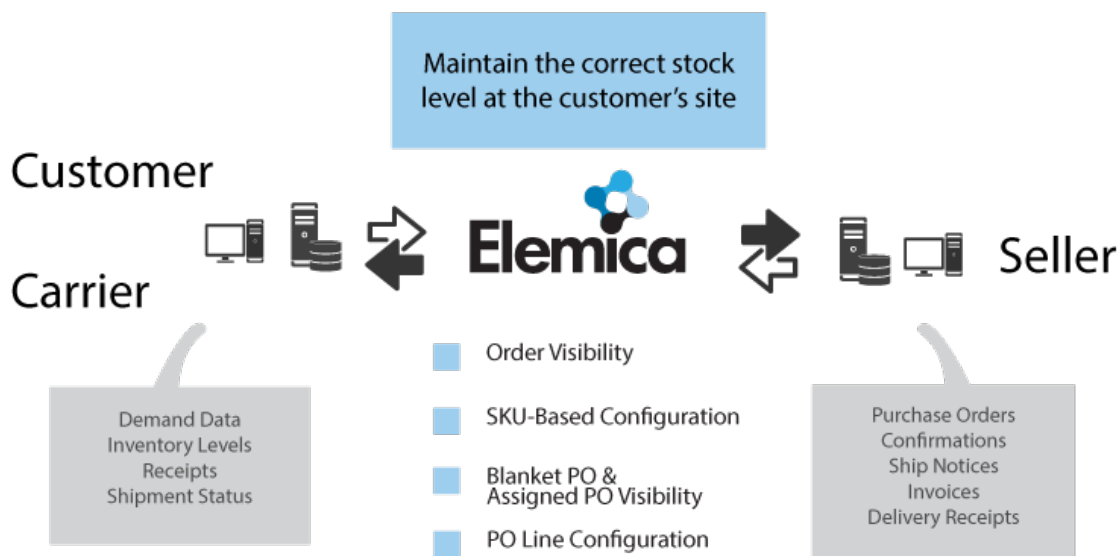

Elemica SmartLink Customer Management Application

Why manually manage any inventory when you don't have to?

Managed inventory programs often require Customer Service Representatives and Planners to analyze order information using web portals and spreadsheets. These manual approaches put inventory policy and working capital at risk while increasing your workload. This results in emergency shipments, stock outs, and other costly inventory inefficiencies. Gain control over your resources and working capital by optimizing your customers' inventory and reducing unplanned events.

Cloud based solutions offering fast and easy implementations with the flexibility to adapt to your dynamic business needs.

Benefits

- Optimize inventory levels to significantly improve working capital
- Reduce costs and inefficiencies
- Improves operational efficiencies and utilization

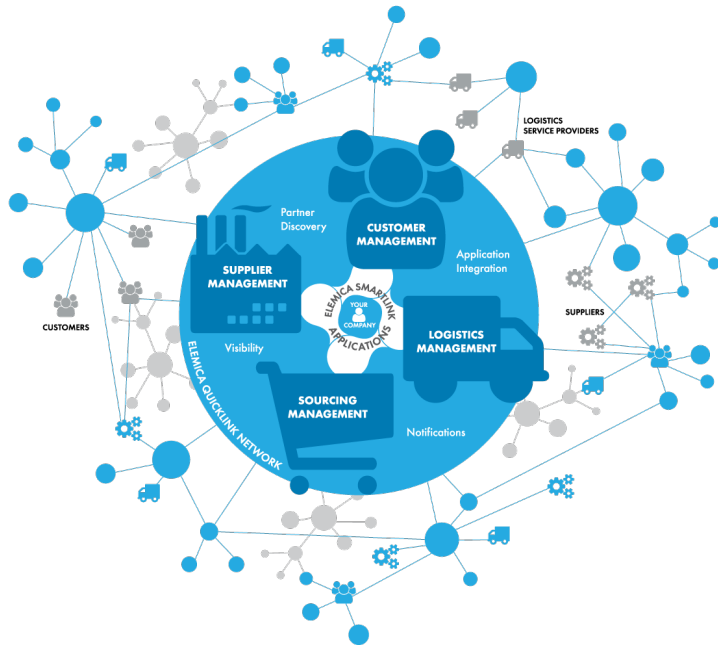

Key Capabilities

- Streamline and simplify your managed inventory replenishment process
- Supports stand VMI and VOMI
- Promotes process standardization and systems integration
- Utilize "touchless" order processing to reduce data entry and errors

Elemica's Vendor Managed Inventory (VMI) Solution puts you in full command of the fulfillment process. This solution enables you to respond quickly and efficiently to changing customer demand patterns by providing real-time visibility into critical inventory and demand information.

The solution models your situation using wide range of user-customizable settings including reorder points, safety stock levels, shipment quantities, receiving calendars, and lead times. You can roll out standardized enterprise-wide VMI processes and inventory management controls and scale your operation, without adding overhead costs.

Solutions Across the Entire Supply Chain
